

DS AUTOMOBILES

# CONNECTED VEHICLES

THE NEW ERA OF DRIVING

**Join the connected car revolution.**

A new level of safety, convenience and entertainment on the road awaits you.

**And make...**

## Your drive safer

1

Experience peace of mind on every journey with DS Automobiles connected vehicles and receive support in case of emergency.

## Your life easier

2

Say goodbye to traditional vehicle management hassles. Monitor your car off board wherever you are with a few taps on your smartphone. When on board, get real-time information of your surroundings.

## Your trip exciting

3

Turn every journey into an adventure with various on-board entertainment options and vocal assistants.

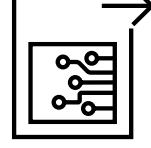

# EMBEDDED CONNECTIVITY

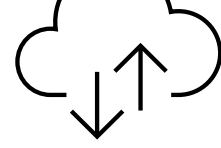

**Your DS is not just a car.**

**You can now manage it like a smartphone.**

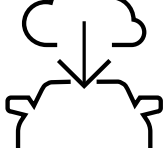

An in-built **telematic box** enables the following functions...

**Internet connection via SIM card** to manage your vehicle remotely.

Storage of the communication with your vehicle **via cloud**.

**Over The Air Software Updates** to always keep your vehicle **up to date**.

**Localisation of your vehicle** and support in case of need, thanks to **embedded GPS**.

# IS YOUR CAR REALLY CONNECTED?

On-board Bluetooth, hotspot tethering or mirroring can only offer you limited connectivity.

## Bluetooth

To pair your car with your smartphone just to share its audio.

## Tethering

To have a temporarily connected car, using your smartphone internet data.

## Mirroring

To use Apple Car Play/ Android auto™ and use your smartphone apps on your car.

**Expand your possibilities** and drive into the future with a true connected vehicle.

A vehicle **equipped with a telematic box** gives you all the advantages of real connectivity.

Connectivity always starts with the **MyDS app**.

**Download it** and begin your connected journey.
